

CHARACTER @ SUA

At Staffordshire University Academy we aim to provide all of our learners with skills that will help them achieve their dreams. Character Education is an innovative programme designed to encourage positive character attributes in our young people. Character Education is delivered through a personalised tutor time programme and also through weekly lessons for Year 7 & 8.

The tutor time programme focuses upon key areas of personal, social and health Education and has three core aims. These are to:

- Broaden the perspectives of our young people
- Challenge conventional thinking
- To encourage our young people to make choices that create a better future

These sessions are designed to be stimulating for our students and offer an environment where they will share opinions, discuss current issues, reflect on how these might be relevant to their own life and circumstances. Students are also encouraged to actively consider how they may contribute to the lives of other people through their actions and beliefs. In many lessons students will examine source material or scenarios in order to consider a range of perspectives.
