Dear Parent/Guardian

**Your young person is due 2 vaccinations that are free on the NHS and are given in year 9 as part of the national immunisation programme. The vaccinations are to protect against Diphtheria, Tetanus and Polio (3-in-1 Teenage Booster) and 4 strains of Meningitis (ACWY).**

- Meningitis ACWY vaccination helps to protect your child against four types of meningococcal bacteria (groups A, C, W and Y) that can cause meningitis (inflammation of the lining of the brain) and septicaemia (blood poisoning). These diseases are very serious and can kill, especially if not diagnosed early.
- The 3 in 1 Teenage booster vaccination protects against Diphtheria, Tetanus and Polio, this should be the 5th dose which completes their childhood course; it boosts protection started earlier with baby and pre-school vaccinations against these diseases to give long lasting protection.

More information regarding these vaccinations can be accessed through the links below, please ensure that you read the information contained in the links below prior to booking an appointment and giving consent for your child's immunisations. You must have parental responsibility or delegated authority to consent for the vaccinations.
